THE REPLY FILED <u>21 June 2011</u> FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.

1. ☒ The reply was filed after a final rejection, but prior to or on the same day as filing a Notice of Appeal. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following time periods:

   a) ☐ The period for reply expires _____ months from the mailing date of the final rejection.

   b) ☒ The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.

      Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).

Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

<u>NOTICE OF APPEAL</u>

2. ☐ The Notice of Appeal was filed on _____. A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a).

<u>AMENDMENTS</u>

3. ☐ The proposed amendment(s) filed after a final rejection, but prior to the date of filing a brief, will <u>not</u> be entered because

   (a) ☐ They raise new issues that would require further consideration and/or search (see NOTE below);

   (b) ☐ They raise the issue of new matter (see NOTE below);

   (c) ☐ They are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or

   (d) ☐ They present additional claims without canceling a corresponding number of finally rejected claims.

     NOTE: _____. (See 37 CFR 1.116 and 41.33(a)).

4. ☐ The amendments are not in compliance with 37 CFR 1.121. See attached Notice of Non-Compliant Amendment (PTOL-324).

5. ☐ Applicant's reply has overcome the following rejection(s): _____.

6. ☐ Newly proposed or amended claim(s) _____ would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).

7. ☒ For purposes of appeal, the proposed amendment(s): a) ☐ will not be entered, or b) ☒ will be entered and an explanation of how the new or amended claims would be rejected is provided below or appended.

   The status of the claim(s) is (or will be) as follows:

See 37 CFR 1.116(e).

Continuation of 11. does NOT place the application in condition for allowance because: Applicant argues that the limitation "wherein the requesting of the re-generation is performed subsequent to the generating the requested display page, and the re-generation of the non-realtime information produces re-generated non-realtime information, and caching the re-generated non-realtime information as cached re-generated non-realtime information, wherein the cached re-generated non-realtime information is configured to be used when generating another instance of the requested display page in response to a subsequent request for the requested display page" is supported in par. [0027] and fig.7.

In response to applicant's argument, fig.7, block "703" cites an "or" condition, wherein if the non-realtime information has been cached, then retrieve ("704" "705") and display ("708") the non-realtime information from the cache. ELSE request the non-realtime information to be generated ("706") and the user can refresh the non-realtime information ("707"). The cited figure and paragraph do not disclose whether or not the regenerated non-realtime information ("706") is cached. Applicant may remove the outstanding 112 rejection by pointing out where the application discloses caching the regenerated non-realtime information ("707").

Applicant argues that provisional Rajkumar does not disclose "wherein the requesting of the re-generation is performed subsequent to the generating the requested display page, and the re-generation of the non-realtime information produces re-generated non-realtime information, and caching the re-generated non-realtime information as cached re-generated non-realtime information".

In response to applicant's argument, provisional Rajkumar discloses a cache regeneration process wherein the cache manager receivies a record update from the application manager and regenerates/updates the cache file. (provisional Rajkumar, pg.6).
